MEMORANDUM FOR: DDCI and DCI

SUBJECT : Coordination of information on Agency
R&D Projects

1. Noting the DCI's memorandum to the DDCI on Agency R&D I would note that since our presentation to the Appropriations Committee last year BPAM has been centralizing and coordinating all the data on Agency R&D to insure full internal and external coordination and use of other R&D where possible and appropriate as directed by the DCI.

2. This has not been without resistance by the components and we recently had to send all the TSD submissions back to them because they provided no information on the projects and said simply that they had the information in their files. We are asking only for enough information to allow coordination and adequate review.
